Re: Docket RM2017-3

Dear Commissioners:

White Coat Waste Project joins the Direct Marketing Association of Washington, the Alliance of Nonprofit Mailers, and the nonprofit mailing community in urging you to reconsider your proposal to change how postal rate increases are calculated and capped. With possible rate increases that could easily range from 28%-40% over the next five years, this proposal will greatly inhibit our ability to fundraise through the mail and negatively impact the work we do.

If USPS price setting is no longer capped by the Consumer Price Index, White Coat Waste Project will be forced to greatly reduce our use of mail. Such a reduction will lead to less revenue, limiting our reach and reducing the amount our organization can spend on fighting taxpayer-funded animal experimentation.

White Coat Waste Project urges the Postal Regulatory Commission to reconsider its proposal.

Sincerely,

Anthony Bellotti
